PRESENTATION OF 500+ WATCHES OVER THE LAST 50+ YEARS

Given the enormous supply of new and pre-owned watches in the global market, Filenios is engaged in advising potential buyers and collectors on making the right selections. The first step is clearing up such an extensive market, and it is perhaps the first time that such a comprehensive presentation is available for free. This E-Book of 162 pages includes more than 15,000 words presenting approximately 500(*) wristwatch models (derived from more than 120 brands), with more than 480 selected photos from the best websites worldwide. This presentation takes place in 2020, a turning point for the watchmaking industry that counts 100 plus years of wristwatch history, and commits the majority of the best watches that have been introduced since the late 1950s, and primarily since the beginning of the quartz era in the early 1970s. Above all, it is addressed to everyone, whatever the budget available for purchasing a brand new or pre-owned wristwatch.

Needless to say, such a work could not be accomplished without the use of the best photos available in the internet, and I am grateful to all those individuals (professionals or not) who have published their work asking their permission to use their photos herein, with the proper citation. Eventually, this E-Book is their own contribution as well for presenting all these amazing timepieces in a single file that potentially might prove a useful database for any professional, collector or enthusiast who will use it. The web resources for the history and evolution of all the brands and models are included in the Link page of my website www.filenios.com.

This market guide is a rigorous personal work, free of any kind of commitments, and represents my personal opinion as an editor. Selecting the best brands and watches, after searching both in time and space this vast market, proved a very big challenge. Being the first work of an extensive upcoming editorial project, It is not subjected to future reviews and updates believing that the time is right for a closing period. The upcoming decades belong to a totally new “smart” era. Having an experience of more than 15 years in searching, collecting watches, being involved in my own projects for designing and assembling watches, I felt the need to prepare this E-Book as a matter of respect to all those industry professionals who have inspired me through their timeless creations.

*In addition to the data provided herein and in supplementary editions, Filenios database includes 30 unpublished lists with 1,750+ reference entries.

Buying - Collecting - Investing in watches

Buying a watch that will keep its value means selecting a watch with character, (a) historical, (b) symbolic, (c) technological, (d) artistic, not just picking up an attractive design. The first step is deciding on the available budget, even if we need to save for some time to secure it, for buying a better watch that will keep longer. Complicated watches that could not be serviced locally are not a smart choice, thus searching for any brand backup and the available facilities in our place is necessary. The mechanical watch purchase demands some basic knowledge, the quartz watch is more affordable, more accurate, less expensive on maintenance, a better watch in practice. Buying a brand new watch is not “obligatory”, sometimes the same money could buy a better pre-owned one. Matching the watch and wrist size secures that we will like our watch in the long run, even when maturity will have overcome the initial temporary impression. We buy a watch for ourselves, not for the others.

Collecting watches does not fall in any official rule, however there are three usual criteria, (a) country of origin, (b) brand, (c) type of watch including vintage or contemporary, among more than 20 categories, plus a generic differentiation among classic, neo-classic, modern, avant-garde watches. No less than 10, no more than 30, with 20 items being an ideal number of timepieces for a complete coherent collection of any type. The basic rule of thumb says that we first study and search, then we decide to buy. These are the differences between the collector and the watch enthusiast. Furthermore, the investor buys on a time-oriented plan.

Investing by definition is the allocation of a sum in the anticipation of a future positive return in the form of generated income. Watches are considered a type of investment on three assumptions. First, we are talking about the allocation of money on vintage or used undervalued timepieces (not brand new excluding selected limited additions). Second, we are located in a place with the proper facilities for servicing and maintaining our collection in the long run, with all necessary documentation. Third, we are committed in a constant evaluation of our watch portfolio, with all available internet market resources. The international market experience from the last two decades (2000-2020) indicates that selected vintage models have at least doubled their price within a time period of 10 years, and that means indicative average annual returns of 5-10%, on the condition that the market is not affected macro-economically. Profoundly such a return is not guaranteed, but it is indicative of the market potential.

FILENIOS INDICATIVE LISTS & TRIBUTES 2020

01	24 selected watches for budget up to 500 euro	P. 5

Selected watches for unlimited budget

MINUTE REPEATERS

The mechanical watches that chime the hours - quarters - minutes on demand, with the use of gongs activated by a special pusher, represent the pinnacle of watch making, the most significant and demanding grand complication in horology. They were invented in the late 17th century by Edward Barlow & Daniel Quare, and they were optimized in their current form by A.L.Breguet in 1783. During the 20th century, the first significant wristwatch models appeared in the 1920s and 1930s credited primarily to the “Three Graces” or the “Holy Trinity” of Swiss watchmaking, AP, PP and VC. The relatively large volume production of MR watches started in the late 1980s/90s though still remaining a task accomplished by a small group of luxury brands, at least till recently in the 2010s. In my humble opinion, and considering a limited number of exceptions, MR watches are the only ones that justify six-digit prices, without ignoring the availability of lower budget models like IWC Portuguese being diachronically the primary example. The presentation herein includes more than 10 selected models, regarded among the best wristwatches of all times!

AUDEMARS PIGUET Jumping Hour MR was introduced in 2007 with reference numbers 26151 and 26356, equipped with hand wound Cal.2907 of 35 jewels and power reserve of 72 hours, fitted in platinum or gold 18k cases of 43mm. These watches are the last successors in a line of models since 1992, with reference numbers 25723, 25797, 25798, 25881, representative timepieces of a long brand tradition in Jumping Hour watches since the 1920s, among the most distinguished MR models ever presented in the market (photos www.watchprosite.com)

MINUTE REPEATERS

PATEK PHILIPPE introduced MR model 3979 in 1989 on its 150th anniversary (circa 100 pcs produced), available in gold18k or platinum cases of 33.5mm, equipped with automatic mechanism R27 of 39 jewels. The same caliber has been used till today in models 5029 (1997/35mm/30pcs), 5079 (2002/42mm) and 5078/5178 (made to order) introduced in 2005/2017 with 38/40mm cases respectively, with all of them regarded as “grail” timepieces (photos www.watchcollectinglifestyle.com)

VACHERON CONSTANTIN after the legendary MR models 30010/30 with Cal.1755 from 1991 (based on 4261 – 1942-1951 36pcs), introduced Patrimony MR model 30110 in 2013 equipped with Cal.1731 of 36 jewels with power reserve of 65 hours, fitted in pink gold18k or platinum cases of 41mm (photos www.watchprozine.com)

MINUTE REPEATERS

ULYSSE NARDIN introduced the Jacquemart line of MR models in 1989 collaborating with the specialist independent watchmaker Christophe Claret, with more than 20 limited edition versions presented in the following 30+ years including ref.numbers 701,716,719,736,739,740,746,749 (more than 600 pcs produced) in addition to the trilogy of Tourbillon MR models 780,786,789 presented in 2011/2015 in a limited production of 220 pcs. All models are available in gold18k or platinum cases of 39-44mm equipped with hand wound mechanisms (photos www.watchprosite.com)

MINUTE REPEATERS

BREGUET classic MR model 7637 was introduced in 2013 equipped with the hand wound mechanism Cal.567/2 of 31 jewels, fitted in gold18k cases of 42mm. It succeeded the much smaller model 3637, first introduced in 1996 equipped with the first version of the same movement (photos www.horobox.com)

JAEGER LECOULTRE Master MR models have been presented in several limited edition versions like 164T450/2450/6409/6420 since 2005 (approximately 1500 pcs produced), equipped with the hand wound mechanism Cal.947 of 43 jewels with 15 days power reserve, fitted in gold18k, platinum or titanium cases of 44mm (photos www.watchprosite.com)

MINUTE REPEATERS

F.P.JOURNE Sovereign Repetition introduced in 2008 as the thinnest market model
 L.FERRIER MR model introduced in 2018 with limited production of circa 5 pcs/year
 H.MOSER Tourbillon MR model introduced in 2019 and available in 10-20 pcs/year
 (photos www.watchesbysjx.com, www.laurentferrier.ch, www.monochrome-watches.com)

MINUTE REPEATERS

SEIKO group luxury sub-brand CREDOR introduced the Spring Drive MR model Sonnerie in 2006, equipped with Cal.7R06 of 88 jewels, fitted in gold18k cases of 43mm. The second improved Spring Drive MR model Node was introduced in 2011, equipped with Cal.7R11 of 112 jewels and power reserve of 72 hours, fitted in gold18k cases of 43mm. Both models are produced in a very limited capacity of 3 watches per year representing the pinnacle of Japanese horology, holding perhaps the most advanced technology in today's watchmaking across the board (photos www.thenakedwatchmaker.com, www.credor.com)

A.LANGE & SOHNE ZEITWERK

Beyond budget limits, there is always the theoretical quest for the one and only timepiece selection. Introduced in 2009 (GPHG award), ALS ZEITWERK model is a unique fusion of digital time display with top quality mechanical horology. A jumping hours & minutes wristwatch out of competition. Equipped with a very demanding in-house mechanism, fitted in big cases, smartly combines a low frequency balance (5 beats/sec) with a constant force escapement, under an original and inspired dial that sets this timepiece apart from anything else in the industry.

This project idea came up in 2004 and materialized five years later, primarily thanks to the work of Jen Schneider, Nils Bode and Anthony De Haas. The six biggest challenges faced in the implementation of this watch were (a) the use of big hour and minute discs instantly changing, (b) the invention of a new very strong mainspring barrel for the high level of energy needed for the mechanism operation, (c) the manipulation of the excessive energy with the use of constant force escapement, (d) the detailed craftsmanship and oiling of the mechanism to sustain the extra wear of daily operation, (e) the edition of acoustic striking functions, (f) the compromising of the case thickness (12-14mm). The final excellent result is reflected on the very positive market reaction, over the last ten years.

The production for each and every watch takes several months, primarily its different components that are hand crafted in-house. The final assembling and testing alone take several weeks and are delivered by a dedicated team, under the responsibility of the watchmaker Robert Hoffmann. Eventually, this is the primary reason for the challenging pricing of this unique line of watches.

RECTANGULAR COLLECTION

Technically more demanding than the round watches, rectangular timepieces put the design element up front, and this is why they are preferable to women, better than men. They are considered very classic, with casual dress orientation, primarily addressed to elder people. Almost all brands include them in their collection, however there are three companies that have been mostly associated with their historical rectangular models. First and for most, CARTIER with models Santos since 1904 and Tank since 1917. Second comes JAEGER LECOULTRE with Reverso model since 1931. Finally, GIRARD PERREGAUX presenting 4 collectible models in the 1990s.

CARTIER

Santos and Tank models are among the very first historical wristwatches with uninterrupted timelines. They have been established as classic casual-dress models, despite associated with aviation and war machines respectively. The preferable editions include Santos Galbee (29x29mm & 32x32mm) since 1987, the anniversary Santos 100 (33x33mm-38x38mm) since 2004, Tank Francaise (25x30mm) since 1996 and Tank Must/Solo (34x25mm & 41x31mm) since 2000s, all equipped with top grade quartz or automatic mechanical ETA based calibers, recently replaced by Richemont group mechanisms.

JAEGER LE COULTRE

Reverso is the most distinguished Art Deco representative timepiece in the market, a true classic model with the characteristic dial flip over case, a patent invented in response to the need of watch protection during polo matches in the early 1930s. The preferable editions include the first water resistant Classique variant (38x23mm including lugs) since 1985 equipped with quartz or HW mechanical calibers, Grande Taille (42x26mm) since 1991 with HW mechanism and small seconds, Grande 8-days (46x29mm) since 2004, the 80th anniversary Ultra-Thin (47x27mm) since 2011.

GIRARD PERREGAUX

The 200th anniversary Anno 1991 (ref.4691-L.E.200 gold18k pcs) and the Tank model (ref.2532) introduced in 1992 were both equipped with hand wound Cal.741. Vintage 94 model (ref.2550-L.E.203 gold18k pcs) and Vintage 1945 model (ref.2595 approx.400pcs) launched in 1995, were both based on vintage watches, equipped with HW Cal.2300 (Pessaux 7001). The last model line includes several successive automatic and tourbillon variants like 2594/93, equipped with in-house Cal.3200.

GRAND SEIKO 60 YEARS

This E-Book coincides with the 60th anniversary for the luxury sub-brand of SEIKO corporation. Along with King Seiko and Credor, GS models have been diachronically the prominent representative watches for the Japanese high-end industry. Passing from the “golden” decade of the 1960s to the resurrection period in the 1990s, GS entered in the 21st century introducing perhaps the most advanced technology ever applied in a timepiece, the hybrid caliber Spring Drive combining the best properties of mechanical and quartz horology. Given its top quality status on all grounds, for both the quartz and the mechanical models available, GS delivers around 40,000 watches annually from its studios in Morioka and Shiojiri. These watches provide for the highest quality/price ratio in the luxury range.

GRAND SEIKO 60 YEARS

TIMELINE

- 1960 First model with Cal.3180 accurate within +12/-3 seconds/day (36,000 pcs)
- 1963 Second model GS57 with quick set date and 35-Jewel Cal.5722 (81,000 pcs)
- 1968 King & Grand Seiko 36000bph models conquer Neuchatel chronometry contest
- 1970 Automatic model 56GS being the last one from the first generation collection
- 1988 First Grand Seiko quartz model 95GS delivering accuracy within 10 sec/year
- 1993 Grand Seiko quartz caliber 9F83 setting the industry top quality standards
- 1998 First new generation Grand Seiko automatic with Cal.9S regulated at +5/-3 s/d
- 2001 Back to origins with mechanical hand wound Cal.9S54 inside model SBGW001
- 2004 First Grand Seiko Spring Drive with Cal.9R65 accurate within +/-1 second/day
- 2008 Grand Seiko Spring Drive diver SBGA029 with 44mm case 200m water resistant
- 2009 Resurrection of the hi-beat models equipped with Cal.9S8 running at 36000bph
- 2010 The 50th anniversary sets the beginning of international expansion in EU and US

THE ICONIC ROLEX OYSTER PERPETUAL DATEJUST

The long timeline of the Rolex Oyster Perpetual models includes many innovations, with date function introduced in 1945 being the one that defined, perhaps the most significant mechanical wristwatch in history. The first Datejust model Ref.4467 presented in the brand 40th anniversary was solid gold and along with the date function, brought in the scenery the “proper” size of 36mm and the “jubilee” bracelet. During the 1950s, there were several developments in the model evolution like the steel and “rolesor” (two-tone steel & gold18k) versions, the current fluted bezel, the date magnifier, the so called “President” Day-Date model, the so called “Thunderbird” Turn-O-Graph model with rotating bezel (associated with USAF pilots), and finally the smaller entry level Date version of 34mm. The next model generation was equipped with the first in-house manufactured automatic mechanism Cal.1575 since 1965, and by that time the water resistance rating of 100m had been set as a standard feature. What missing though, was the quick date shift during time adjusting, provided by the chronometer grade 27-jewel Cal.3035, introduced in 1977 and operating at 28800 bph with 42-hour power reserve. In 1988, Rolex Datejust undergone its most important upgrade equipped with sapphire crystal and the COSC 31-jewel Cal.3135 operating at 28800 bph with 48-hour power reserve featuring a KIF shock absorber and a Breguet overcoil hairspring at the beginning, replaced by the innovative blue Parachrom hairspring (fully antimagnetic with increased shock resistance) since 2005. Proven very serviceable, reliable and durable during the last 30+ years, many technicians consider it as the GOAT automatic mechanism. In the late 2000s, the model was subjected to the sacrilege (my opinion) of the larger 41mm version, and since 2017 has been equipped with the new COSC 31-jewel Cal.3235 operating at 28800 bph with increased power reserve up to 70 hours, derived from a longer mainspring and a new more efficient escapement wheel, in addition to a new rotor application and the brand proprietary Paraflex shock absorber.

FINAL 4 ICONIC TIMEPIECES

FINAL 4 ICONIC TIMEPIECES

Normally we need two watches, one casual-dress and one casual-sport. These four iconic models are the top representatives of the two major categories. PATEK PHILIPPE CALATRAVA introduced in 1932 has diachronically set the standards for dress watches. OMEGA SPEEDMASTER introduced in 1957 is the most affordable and collectible among the classic watches in the luxury range. ROLEX COSMOGRAPH DAYTONA introduced in 1963 is the epitome of sport watches and the most coveted timepiece in history. A.LANGE & SOHNE LANGE 1 introduced in 1994 is the best classic watch for the connoisseur, a symbolic timepiece not only for the German, but for the entire watchmaking industry. The presentation that follows in the next pages is the last stand for the mainstream brands herein, and it covers the most preferable editions of these for front collections.

Ode to simplicity

The long standing Calatrava line starting with the original Ref.96 (designed by D.Penney) includes more than 30 editions, most of them aside the characteristic “Bauhaus” principle (form follows function). Back in 1932, it was the first model presented from PATEK PHILIPPE under the administration of Stern family, and proved to be a determinant factor for the brand coronation in the market.

Cars & Watches

Appeared in the 1960s, racing chronographs are regarded as the most appealing sport watches for their profound correlation with the No.1 male fetish. Daytona is fully bonded with this scenery from day one. The presentation herein focuses on the automatic TUDOR & ROLEX models, among the most beautiful watches across the board. The preferable Speedmaster editions are mostly those associated with F1 driver M.Schumacher, among the best OMEGA chronographs of all times.

Ueber Alles

The reason has not been listed herein so far is because it deserves a special tribute. Fully oxymoron, despite its very high price, it is considered the “best value for money” hyper luxury brand model, addressed only to those who could afford it, both financially and mentally, since it sets the standards for the perfect casual dress watch in an unfair comparison with the rest portfolio. Top quality hand wound mechanism, with 3-day power reserve, proper size gold or platinum case, all the necessary time functions and push adjusted big date, all packed in an investment item.

PATEK PHILIPPE CALATRAVA

First edition 96 equipped with manufactured Cal.12''120 since 1934, housed in 31mm case, produced in several dress, sport, military versions, from 1932 to 1973. Minimum indicative price 8,000 euro.

PATEK PHILIPPE CALATRAVA

Editions 570 and 565 introduced in 1938, equipped with the same mechanism Cal.12''120, but also Cal.27SC since 1949, housed in larger 35mm case. Minimum indicative price 20,000 euro.

PATEK PHILIPPE CALATRAVA

Edition 2526 introduced in 1953 (approx.600pcs), equipped with automatic Cal.12-600AT, the first ever with decorated gold18k rotor, housed in 36mm cases. Minimum indicative price 40,000 euro.

Photo credit www.hodinkee.com

PATEK PHILIPPE CALATRAVA

The Ultra-thin edition 3520 introduced in 1965, was equipped with Cal.175 and later on Cal.177 (F.Piguet Cal.21). It was replaced by edition 3919 (1985 - 2005), equipped with the high-beat Cal.215, the longest lived brand mechanism since 1974. Both housed in 32-33mm cases, with the very characteristic hobnail bezel since 1973. These are the most affordable mechanical editions with market price below 10,000 euro. The successive editions 5115/5116 with enamel dial and 5119 with lacquered dial (2000 - 2018) perhaps the best in the model timeline, were equipped with the same mechanism Cal.215, housed in 35-36mm cases. Minimum required budget 15,000 euro, for post 2000 editions.

PATEK PHILIPPE CALATRAVA

Quartz editions 3744 and 3944 introduced in the late 1970s and 1980s respectively, equipped with Cal.E27 (6 jewels) and Cal.E23SC (7 jewels), housed in 33mm cases, with hobnail bezel. Minimum indicative price 7,000 euro.

Photo credit www.hqmilton.com

PATEK PHILIPPE CALATRAVA

Edition 3802 introduced in the 1980s, equipped with automatic Cal.315, and edition 5120 introduced in the early 2000s, equipped with automatic Cal.240. Both housed in hobnail bezel cases of 33mm and 35mm respectively. Minimum Indicative price 15,000 euro.

Photo credit www.nostime.com & www.watchobserver.com

PATEK PHILIPPE CALATRAVA

Heritage editions following the original design have been introduced since the early 2000s. Hand wound 5196G/5196P(the only platinum edition) and 5123 are all equipped with Cal.215, housed in 37-38mm cases. Editions 5107/5127/5296/5227(with concealed hinge case back) are all equipped with automatic Cal.315/324, housed in 37-39mm cases. Minimum indicative budget required 20,000 euro for the gold editions and 40,000 euro for the platinum.

OMEGA SPEEDMASTER

Editions 351333/381333(Date)/352053(Day-Date) were introduced in 1996, equipped with Cal.1152/1151 an upgraded and refined version of Cal.ETA-7750/7751, housed in 39mm cases. Average indicative price 3,000 euro.

OMEGA SPEEDMASTER

Carbon dial L.Editions 351950(Date)/352950(Day-Date) were introduced in 2001/2002, equipped with Cal.1152/1151 an upgraded and refined version of Cal.ETA-7750/51, housed in 39mm cases. Average indicative price 3,000 euro.

OMEGA SPEEDMASTER

Carbon dial edition [355259](#) and limited edition [355932](#) (6000 pcs) were introduced in 2003, equipped with column wheel COSC Cal.3301 based on Frederic Piguet Cal.1285, housed in 42mm cases. Av.price 4,000/6,000 euro.

OMEGA SPEEDMASTER

The last "Legend" editions 350631/350661/350751 were produced in 2005-2009, equipped with column wheel chronometer grade Cal.3301 based on Frederic Piguet Cal.1285, housed in 42mm cases. Average price 5,000 euro.

OMEGA SPEEDMASTER

“New Date” preferable (“Panda”) editions [321051](#)/[321131](#)/[3233040](#)/[3233240](#) first presented in 2006, equipped with chronometer top grade automatic Cal.1164/3304, the last and best versions used in Speedmasters, for the “workhorse” Valjoux origin Cal.ETA-7750/53, housed in 10ATM stainless steel cases of 40mm. Average indicative price 2.500 euro.

OMEGA SPEEDMASTER

Moonwatch editions “Japan Special” 357040 presented in 2004 (LE 2004 pcs following the design of editions 145012/022 from 1968/1970) and “Racing” produced in 2013-2015 (estimated production less than 2000 pcs), equipped with hand wound Cal.1861 based on Lemania 1873, housed in 42mm cases with hesalite curved crystal. Minimum indicative price 10,000-12,000 euro.

ROLEX COSMOGRAPH DAYTONA

Edition 16520 introduced in 1988 with black or white dial, equipped for the first time in the model timeline with automatic chronometer grade Cal.4030. This is an extensively modified ZENITH El Primero mechanism running at 28800 beats/hour (50HPR), fitted with a larger free-sprung Glucydur balance wheel with Breguet overcoil and new escapement, housed in 10ATM stainless steel cases of 40mm. Minimum indicative budget required 25,000 euro.

Photo credit www.hqmilton.com

ROLEX COSMOGRAPH DAYTONA

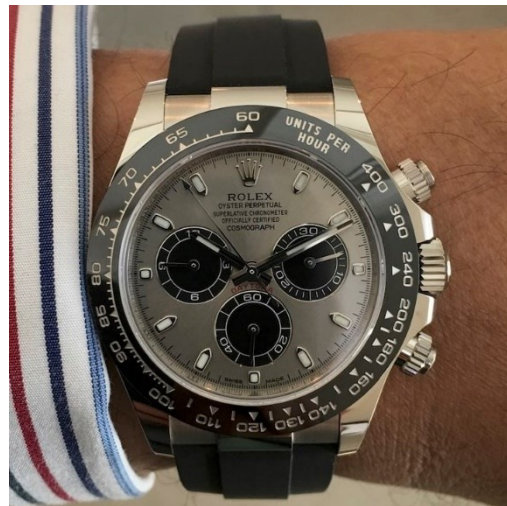

Successive Edition 116520 introduced in 2000 with black or white dial, equipped with in-house manufactured automatic column wheel COSC Cal.4130 with 72-hour p.reserve. This is one of the best and most reliable mechanisms ever presented in the industry featuring the patented blue Parachrom hairspring for improved shock resistance, housed in 10ATM stainless steel cases of 40mm. Minimum indicative budget required 20,000 euro.

Photo credit www.hodinkee.com

ROLEX COSMOGRAPH DAYTONA

Successive Edition 116500LN introduced in 2013 with black or white dial, in addition to black ceramic bezel, equipped with in-house manufactured automatic column wheel chronometer grade Cal.4130, housed in 10ATM stainless steel cases of 40mm. Min. indicative budget required 25,000 euro.

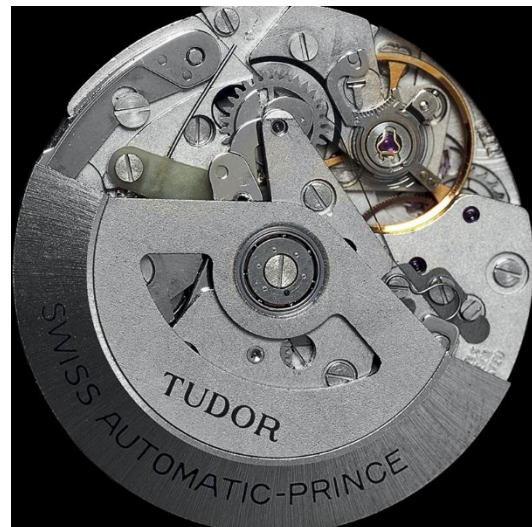

Photo credit www.hodinkee.com & www.monochrome-watches.com

ROLEX COSMOGRAPH DAYTONA

Gold-Ceramic editions [116518LN](#) and [116519LN](#) introduced since 2017 with several dial options, equipped with in-house manufactured automatic column wheel chronometer grade Cal.4130, housed in 10ATM yellow/white gold 18k cases of 40mm, with black ceramic bezel and rubber “oysterflex” strap. Minimum indicative budget required 45,000 euro.

ALS LANGE 1 GUILLOCHE

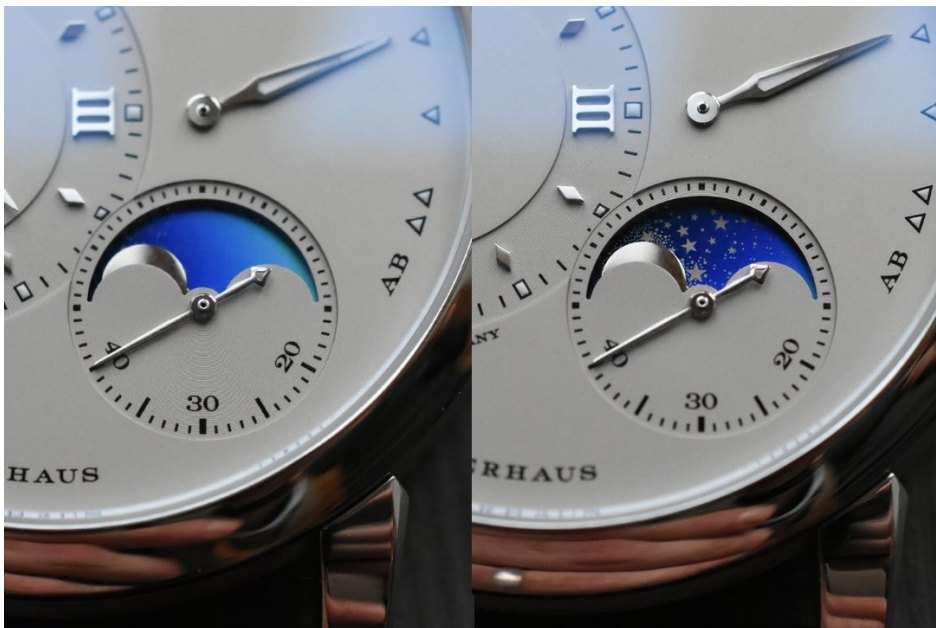

Guilloché LE [112.021/049](#) introduced since 1998, succeeded by [110.030/031](#) in 2001-2009 and [101.061-065](#) in 2014, all equipped with Cal.L901, housed in 38.5mm cases. In 2018, editions [181.037-039](#) are equipped with the new hand wound Cal.L121 housed in 37mm cases. Total est. volume 1000 pcs so far. Min. indicative price 30,000 euro.

ALS GRAND LANGE 1

Mixed dial larger size editions [115.021/115.031](#) since 2003 and [115.022/028/029/032/046](#) later on, use gold18k cases of 41-42mm, equipped with Cal.L901. Editions [117.021/025\(Pl\)/028/032](#) and LE [117.035](#) (Lumen 200 pcs), [117.066](#) (25th Anniv. 25 pcs), along with the respective moonphase editions [139.021/025/032/035/066](#), are all equipped with Cal.L095 since 2012. Min. indicative price 20,000 euro.

ALS LANGE 1 NEW

Introduced in 2015, editions [191.021/025/028/032/039/066](#) are equipped with the new 43-Jewel hand wound Cal.L121 maintaining 72-hour power reserve with instant date change, housed in gold18k or platinum cases of 38.5 mm. Minimum indicative price 25,000 euro.

ALS LANGE 1 MOONPHASE DAY/NIGHT

Last preferable editions [192.025/029/032/066\(LE\)](#) introduced in 2016, are equipped with the new Cal.L121.3 version, additionally featuring moonphase and day/night functions, housed in gold18k or platinum cases of 38.5 mm. Minimum indicative price 33,000 euro.

INDEPENDENT WATCHMAKERS

This very particular group is associated with the history of great watchmakers like G.DANIELS, D.PRATT, R.DUBUIS, D.ROTH, P.M.GOLAY, M.PARMIGIANI, F.MULLER, and is typically represented by AHCI association (Academie Horlogere des Createurs Independants), established in 1985 by S.ANDERSEN and V.CALABRESE in Genève. Its current list includes more than fifty active, candidate and former members, among them PHILIPPE DUFOUR, perhaps the most acclaimed and respected watchmaker today. Profoundly, there is a great number of independent watchmakers that have not been associated including small boutique brands established after WWII. The basic prerequisite is that either the physical person is a watchmaker himself or herself, or an independent brand uses its own watchmaker(s) without outsourcing, engaged in a limited production of timepieces, typically up to 10,000/1,000/100 pcs per year (scaling). In practice, there are 4 categories of independent watchmakers.

1. Avant-garde watchmakers engaged in the presentation of extravagant timepieces, with extremely high prices. Usually, this category refers to in-house manufactured watches of extreme design and questionable use satisfying primarily the inner creative need of the watchmaker.
2. Watchmakers engaged in the presentation of basic function or complicated timepieces with in-house/exclusive manufactured mechanisms. This category usually concerns very expensive watches with mechanisms designed from scratch that justify their creation on important specifications, like the increased power reserve or the addition of rare applications.
3. Watchmakers engaged in the presentation of basic function or complicated timepieces with modified/re-worked mass production calibers. This category covers the “smart” watchmaking and the introduction of relatively more affordable watches, with interesting and unusual functions per case.
4. Watchmakers engaged in the presentation of basic function or complicated watches with outsourced top-grade mass production calibers. This category represents the “honest” watchmaking and the introduction of rather affordable high-quality mechanical timepieces, finished and assembled with the personal care and attention of the watchmaker himself or herself.

Independent watchmakers have traditionally a significant presence in the annual GPHG (Grand Prix D’Horlogerie de Geneve) prize lists, and especially the AHCI members have already claimed 26 awards in the twenty-year institution history. This presentation herein includes more than sixty (60) selected independent brands, with several AHCI members among them.

AMERICAN INDEPENDENT WATCHMAKERS

American watchmaker RGM established in 1992 by Roland G. Murphy presenting timepieces equipped with in-house manufactured hand wound Cal.801 (based on ETA-6498) fitted in stainless steel cases of 42mm, along with other more affordable models, equipped with premium Swiss calibers. This is the premier American watch brand driving the new era of development for the local industry in the 21st century (photos www.rgmwatches.com)

American namesake watchmaker WEISS established by Cameron Weiss in 2013 presenting timepieces equipped with manufactured hand wound Cal.1003 (modified ETA-6497) fitted in stainless steel cases of 42mm (photos www.ablogtowatch.com)

ASIAN INDEPENDENT WATCHMAKERS

Israeli watchmaker ITAY NOY established in 2000 presenting timepieces equipped with skeletonized/modified top quality Swiss mechanisms fitted in stainless steel cases of 36-44mm (photos www.itay-noy.com)

ASIAN INDEPENDENT WATCHMAKERS

Japanese watchmaker HAJIME ASAOKA after presenting his first Tourbillon watches around 2010, established in 2019 (Tokyo) the brand KURONO introducing more affordable classic and chronograph models, equipped with refined premium Japanese automatic mechanisms like MIYOTA-9055 and SEIKO-NE86A, fitted in stainless steel cases of 37-38mm. All models are presented in limited editions (photos www.quillandpad.com, www.kuronotokyo.com)

BRITISH INDEPENDENT WATCHMAKERS

British watchmaker GARRICK established in 2015 by David Brailsford and Simon Michlmayr presenting timepieces with both in-house designed mechanisms and modified/optimized UNITAS/ETA-6497/98 calibers, fitted in 42mm s.steel cases (photos www.garrick.co.uk)

BRITISH INDEPENDENT WATCHMAKERS

British watchmaker WESSEX established in 2015 by Jamie Boyd presenting customized timepieces with hand-made silver dials, equipped with standard premium Swiss mechanisms, fitted in stainless steel cases of several size options (photos www.wessexwatches.co.uk)

British/Scottish watchmaker ANORDAIN established in 2015 at Glasgow presenting timepieces with in-house crafted enamel dials, equipped with hand wound or automatic mechanisms Cal.SW-210/ETA-2824, fitted in s.steel cases of 36-38mm (photos www.hodinkee.com)

DUTCH INDEPENDENT WATCHMAKERS

Dutch watchmaker CHRISTIAAN VAN DER KLAUW presenting astronomic wrist watches since 1994 including the model Planetarium five years later, equipped with a decorated automatic mechanism featuring the smallest planetarium system ever built, fitted in steel or gold cases of 40mm (photos www.monochrome-watches.com)

Dutch watchmaker VAN DER GANG presenting in-house produced chronograph and GMT models since the early 2000s, equipped with modified automatic mechanisms based on ETA-7750/2892, fitted in stainless steel or gold 18k cases of 41mm (photos www.monochrome-watches.com)

DUTCH INDEPENDENT WATCHMAKERS

Dutch watchmaker STEFAN KETELAARS presenting timepieces equipped with extensively modified hand wound ETA-6497 mechanisms, with inversed balance, fitted in stainless steel cases of 42mm (photos www.ketelaarswatches.com)

Dutch watchmaker GRONEFELD established by the “Horological brothers” Bart and Tim presenting since 2008 excellent quality watches with in-house mechanisms of hand crafted steel bridges and plates, with remontoire constant force and jumping second applications, fitted in stainless steel, gold 18k, or even platinum cases of 39.5mm (photos www.gronefeld.com)

EUROPEAN INDEPENDENT WATCHMAKERS

Austrian watchmaker HABRING established in 2004 by Maria Kristina and Richard Habring presenting 3-hand, chronographs and highly complicated timepieces (including dead-beat seconds, split chronographs, 5-minute repeater based on Debus-Depraz module D-90) equipped since 2014 with in-house manufactured mechanisms based on VALJOUX/ETA-7750 caliber, fitted in stainless steel cases of 36-43mm. These are the “best value for money” timepieces in the segment of independent watchmaking (photos www.habring2.com)

EUROPEAN INDEPENDENT WATCHMAKERS

Irish brothers and watchmakers JOHN & STEPHEN McGONIGLE established their own brand in 2004 based in Ireland and Switzerland presenting since 2007 three types of watches, a tourbillon and a min.repeater (2016), plus the 3-hand Tuscar model (2011) in L.E. of 50 pcs, equipped with in-house designed and crafted calibers on silver alloy, fitted with sapphire dials in gold18k cases of 43mm. In 2019, John McGonigle pursued his own project presenting L.E. OILEAN H-B1 chronograph, with fully reworked old calibers VALJOUX-88, fitted in titanium cases of 40mm (photos www.quillandpad.com & www.thelimitededition.co.uk)

EUROPEAN INDEPENDENT WATCHMAKERS

Czech manufacture watchmaker ELTON/PRIM presenting since 1954 formal dress and sport timepieces equipped with in-house hand wound or automatic mechanisms fitted in stainless steel cases of 34-45mm (photos www.prim.cz)

EUROPEAN INDEPENDENT WATCHMAKERS

Russian manufacture watchmaker RAKETA established in 1961 and relaunched in 2011 after reorganization presenting heritage models Polar 24h (1969) and Big Zero (1983) equipped with in-house manufactured automatic mechanisms fitted in stainless steel cases of 39-44mm (photos www.raketa.com)

EUROPEAN INDEPENDENT WATCHMAKERS

Slovakian watchmaker MOLNAR FABRY established in 2006 presenting unique customized timepieces skeletonized and artistically treated based primarily in the hand wound Swiss mechanisms ETA-6497/98 fitted in stainless steel, gold18k or even platinum cases (photos www.ablogtowatch.com)

Hungarian third-generation traditional watchmaker AARON BECSEI (BEXEI brand) presenting the fully bespoke Dignitas Pure/P.Reserve models, equipped with in-house designed and crafted hand wound mechanisms with silver plate/bridges, fitted in/with similarly in-house crafted large rectangular (37x42mm) cases & dials of any metal (photos www.bexei.hu)

EUROPEAN INDEPENDENT WATCHMAKERS

Russian watchmaker KONSTANTIN CHAYKIN presenting the single hand timepiece Genius Temporis equipped with reconstructed ETA-6497 caliber fitted in rose gold 18k cases of 44mm as well as the Wristmons line (page 161) equipped with modified Cal.ETA-2824 or Vaucher-3002 (photos www.ablogtowatch.com)

Spanish self-taught watchmaker ANICETO HIMENEZ PITA presenting since 2005 innovative handmade crownless watches like Carousel, Molinos Orbital and Oceana (diver model water resistant up to 2,000/5,000m), equipped with modified automatic ETA caliber and featuring the patented applications Time Setting Mechanism (TSM) and Remote Transmission (RT) (photos www.pita.barcelona)

FRENCH INDEPENDENT WATCHMAKERS

French manufacture watchmaker PEIGNNET established in 1973 and presenting timepieces equipped with in-house manufactured hand wound or automatic mechanisms (Calibre Royal) since 2011, fitted in stainless steel, titanium or gold 18k cases of 41-44mm. In addition, the same brand maintains a more affordable line of casual and sport models with standard Swiss mechanisms like Moorea (photos www.watchprozine.com, www.chrono24.com)

FRENCH INDEPENDENT WATCHMAKERS

French watchmaker JEAN-BAPTISTE VIOT located in Paris, produces upon order and delivers very few 38mm timepieces per year, equipped with his own hand wound mechanism, designed and hand crafted in-house using brass, silver, steel and gold18k alloys. Specialized in restoration, after working for more than 10 years for brands like Breguet & PP, he is one of the few traditional watchmakers epitomizing on the ancestral techniques (photos www.equationdutemps.blogspot.com)

French watchmaker SARTORY BILLARD presenting customized timepieces, equipped with Swiss automatic mechanisms, fitted in stainless steel or titanium cases of several size options (photos www.watchesbysjx.com)

GERMAN INDEPENDENT WATCHMAKERS

German watchmaker STEFFEN CORNEHL established in Stuttgart presenting timepieces with modified/optimized ETA-6498 calibers fitted in stainless steel cases of 40/42mm (photos www.cornhel-watches.com)

German watchmaker D.DORNBLUTH & SOHN presenting timepieces with extensively modified/optimized mechanisms, primarily ETA-6497/98 calibers, fitted in stainless steel or gold 18k cases (photos www.definewatches.com.au)

GERMAN INDEPENDENT WATCHMAKERS

German watchmaker THOMAS NINCHRITZ established in Nuremberg presenting timepieces with modified/optimized ETA-6497/98 calibers fitted in stainless steel cases of 42mm (photos www.watchnet.com)

German watchmaker SCHAUBURG presenting automatic and hand wound timepieces, preferably equipped with modified ETA-6497/98 calibers, fitted in stainless steel cases of 42mm (photos www.schauburgwatch.com)

GERMAN INDEPENDENT WATCHMAKERS

German engraver JOCHEN BENZINGER presenting timepieces equipped with artistically engraved dials, in addition to modified/optimized/skeletonized contemporary and historical mechanisms, primarily hand wound ETA-6497/98 calibers, fitted in stainless steel or gold 18k cases (photos www.watchdavid.com)

GERMAN INDEPENDENT WATCHMAKERS

Brands AETHER (US) and JAEGER & BENZINGER (GER) presenting timepieces in collaboration with BENZINGER atelier, equipped with dials and standard Swiss mechanisms subjected to artisanal engraving, fitted in stainless steel cases of various sizes (photos www.ablogtowatch.com & www.watchbuys.com)

GERMAN INDEPENDENT WATCHMAKERS

German watchmaker STEFAN KUDOKE presenting timepieces equipped with modified/skeletonized ETA-6497/98 hand wound calibers fitted in stainless steel cases of 42mm as well as with manufactured hand wound mechanisms (based on HABRING A11B) fitted in stainless steel cases of 39mm (photos www.timeandwatches.com)

GERMAN INDEPENDENT WATCHMAKERS

German brand NIVREL of Swiss origin presenting perhaps the most affordable current line of repeater watches including a limited series of “piece unique” artistic timepieces, all equipped with DEBOIS DEPRAZ 5-minute repeater module mounted on base automatic Cal.ETA-2892-A2, fitted in stainless steel cases of 42mm (photos www.nivrel.com)

GERMAN INDEPENDENT WATCHMAKERS

German watchmaker RAINER NIENABER presenting among other timepieces retrograde models like Retro-2 equipped with modified ETA-2824-2 automatic mechanisms fitted in stainless steel or gold18k cases of several size options (photos www.nienaber-uhren.de)

German watchmaker ANDREAS HENTSCHEL established in Hamburg presenting timepieces equipped with refined/optimized and even reconstructed AS-1130 hand wound mechanisms fitted in stainless steel or gold 18k cases of circa 39mm (photos www.watchprozine.com)

GERMAN INDEPENDENT WATCHMAKERS

German watchmaker JORG SCHAUER re-established STOWA brand and introduced his own high range line in the middle 1990s, with the model Edition-12 being one of the best “ValJoux” chronographs in the market, fitted in s.steel cases of 41mm (photos www.watchuseek.com)

German fourth-generation watchmaker DANIEL MALCHERT located in Quedlinburg presenting since 2011 his own watch equipped with NOMOS GLASHUTTE ALPHA hand wound mechanisms based on PESEUX-7001, fitted in s.steel cases of 36mm (photos www.hondikee.com)

GERMAN INDEPENDENT WATCHMAKERS

German female watchmaker CHRISTINE GENESIS established her own brand in 2005 presenting classic 3-hand and chronograph timepieces equipped with modified and refined elaborate Swiss automatic mechanisms Cal.ETA-2892/7750, fitted in stainless steel cases of 38-40mm (photos www.genesis-uhren.de)

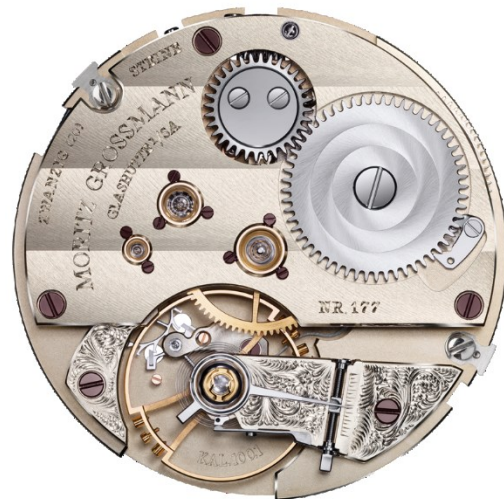

German watchmaker LEINFELDER established in Munich in 2010 is the first brand equipped with the top grade UWD (Uhren-Werke-Dresden founded in 2013) hand wound mechanisms, fitted in stainless steel or gold 18k cases of 41-42mm (photos www.leinfelder-uhren.com, www.uhren-werke.de)

GERMAN INDEPENDENT WATCHMAKERS

German watchmaker ROLF LANG established in Dresden presenting timepieces with manufactured hand wound mechanisms (based on ETA-6498) fitted in stainless steel or gold 18k cases of 44mm (photos www.rolf-lang-dresden.com)

German manufacture watchmaker MORITZ GROSSMANN established by Christine Hutter in 2008 and headquartered in Glashutte since 2010 presenting timepieces with in-house produced and meticulously finished hand wound or particular automatic mechanisms, fitted in stainless steel, gold 18k or even platinum cases of several size options (photos www.grossmann-uhren.com)

GERMAN INDEPENDENT WATCHMAKERS

German watchmaker CHRISTIAN KLINGS was born and trained in Dresden where he found himself occupied with the restoration of old clocks and watches. After living abroad for some years, he returned home in 2000 and started working alone, hand crafting from scratch one off bespoke wristwatches. In the last 20 years, he has delivered around 30 collectible timepieces (photos www.christianklings.com)

German watchmaker VOLKER VYSKOCIL presented in 2004 his unique watch model equipped with in-house designed and crafted hand wound mechanism fitted in gold 18k case of 38/40mm. He has been one of the very few traditional watchmakers working alone on every process, addressing his work to the purists (photos www.tempered-online.com)

GERMAN INDEPENDENT WATCHMAKERS

German manufacture watchmaker LANG & HEYNE founded in 2001 at Dresden by Marco Lang and Mirko Heyne presenting timepieces equipped with extensively modified ETA-6497/98 calibers, but also in-house manufactured hand wound mechanisms, fitted in round gold18k or platinum cases of 39-43mm. The most representative perhaps model is Georg in rectangular gold18k cases of 32x40mm. Common characteristic of all calibers the meticulous finishing along with the silver grinding of plates and bridges, the combination of solid gold14k wheels with steel pinions, the Breguet balance spring with solid gold14k masses and anchor. Today the brand continues without its founders under the umbrella of Tempus Arte Holding company (photos www.lang-und-heyne.de)

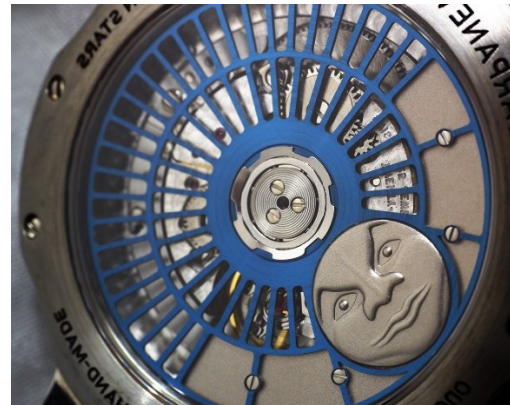

SCANDINAVIAN INDEPENDENT WATCHMAKERS

Swede watchmaker GOS established by Johan Gustafsson and Patrik Sjogren presenting timepieces equipped with Swiss mechanisms like the hand wound Technotime TT718 fitted with/in hand crafted Damascus steel dials and cases of 43mm (photos www.goswatches.com)

Icelander watchmaker JS established in 2005 by 4 collectors under the guidance of Gilbert O GudJonsson presenting among others the GMT model Vinland equipped with premium Swiss automatic mechanisms fitted in stainless steel cases of 41mm (photos www.jswatch.com)

SCANDINAVIAN INDEPENDENT WATCHMAKERS

Finn watchmaker STEPAN SARPANEVA established his own brand in 2003 and 5 years later started presenting the characteristic Korona K0/K1/K2/K3 models equipped with modified (moonphase per case) automatic SOPROD mechanisms, fitted in large stainless steel cases. In 2008, he also established SUF HELSINKI with more affordable models, and recently introduced the Lunations line with his own manufactured hand wound calibers (photos www.monochrome-watches.com)

SWISS INDEPENDENT WATCHMAKERS

Swiss watchmaker ANDERSEN GENEVE founded in the late 1970s by the Danish Svend Andersen (mentor of several independent watchmakers like Franck Muller and Felix Baumgartner), has established a long tradition in presenting particular timepieces of artistic character, equipped with premium Swiss mechanisms. The collection Montre A Tact, based on a concept of A.L.Breguet from the late 18th century, is perhaps the most characteristic line with gold 18k models of 40-42mm, equipped with automatic calibers modified in-house, and subjected to dial customization for those who could afford buying a different and unique collectible timepiece (photos www.andersen-geneve.ch)

SWISS INDEPENDENT WATCHMAKERS

Neapolitan watchmaker VINCENT CALABRESE (creator of baguette movement for Corum) and German watchmaker THOMAS PRESCHER (pioneer in multi-axis tourbillon) presenting Swiss made timepieces equipped with modified standard automatic mechanisms ETA-2892 and ETA-2824, fitted in stainless steel or gold 18k cases of 35-44mm, with the preferable models of the first being BEAUTY FUEL & KRONOS with jumping hour indication on a rotating dial depicting the Greek mythology Titan (photos www.ninanet.net & www.watchprosite.com) whereas the preferable models of the second being the artistic TEMPUS VIVENTI & NEMO with characteristic large cases made from steel, gold, or copper/bronze alloys (photos www.independentintime.com & www.watchprozine.com)

SWISS INDEPENDENT WATCHMAKERS

Swiss master watchmaker MICHEL PARMIGIANI, backed by SFF (Sandoz Family Foundation), established his own namesake luxury brand in 1996 at Fleurier, along with the creation of VAUCHER MANUFACTURE in 2003, engaged in the production of top quality mechanisms for his own brand, but also supplied to third parties. Producing approximately 5,000 timepieces per year (including highly complicated ones), with movements and cases manufactured fully in-house, he has set the capacity limits for independent watchmaking. Preferable models include the Toric line, Kalpa Qualite Fleurier and chronograph, Tonda 3-hand and annual calendar (photos www.monochrome-watches.com)

SWISS INDEPENDENT WATCHMAKERS

German watchmaker MARTIN BRAUN and Swiss watchmaker PIERRE KUNZ presenting Swiss made timepieces equipped with modified top grade automatic mechanisms ETA-2892 fitted in stainless steel or gold 18k cases of 40-44mm, with the preferable model of the first being EOS with retrograde indications for sunrise and sunset time, and the preferable line of the second being casual/sport models with retrograde second function. In 2013 under the brand name ANTOINE MARTIN, the first presented the model Slow Runner, equipped with a movement operating at a frequency of 1Hz featuring an ultra large titanium balance with silicon hairspring (photos www.chrono24.com & www.ablogtowatch.com)

SWISS INDEPENDENT WATCHMAKERS

Swiss watchmaker LAURENT FERRIER, ex technical director of PP, established his own namesake brand in 2009 at Geneve producing around 100-150 watches per year, with Origin being an entry level model, equipped with in-house manufactured mechanisms, fitted in titanium cases of 40mm (photos www.laurentferrier.ch)

French watchmaker FRANCOIS-PAUL JOURNE established his own brand in 1999 at Geneve, and he is perhaps the most successful of all producing around 800 watches annually, equipped with patented in-house manufactured gold18k mechanisms, with the entry level model being Chronometre Souverain introduced and awarded in 2005, available in gold18k or platinum cases (photos www.ablogtowatch.com)

SWISS INDEPENDENT WATCHMAKERS

Finn watchmaker KARI VOUTILAINEN established his own brand in 2002 at Motiers, and has been engaged in the limited production of approximately 50 handmade and customized watches per year. Since 2011, he has developed his own “direct impulse” mechanism with double escapement wheels and power reserve of 65 hours, crafted on silver plate and bridges, fitted in cases of 39mm. Inspired by and associated with the legacy of UJS, he sets the “rational” upper price limits for independent watchmaking, and he also supplies his own dials and cases to other brands, with the primary example being the Spanish OPHION providing for more affordable alternatives to one of the best wristwatch designs in the market (photos www.ablogtowatch.com, www.monochrome-watches.com, www.watchlounge.com)

SWISS INDEPENDENT WATCHMAKERS

Swiss watchmaker ARMIN STROM presenting System 78 model equipped with in-house manufactured automatic mechanism with micro-rotor and an innovative “Equal force” mainspring barrel, fitted in stainless steel or gold 18k cases of 41mm (photos www.monochrom-watches.com)

Swiss watchmaker SPEAKE MARIN presenting an Open Worked model equipped with in-house manufactured automatic mechanism with micro-rotor, fitted in the brand characteristic “Piccadilly” design titanium or gold 18k cases of 38/42mm (photos www.speake-marin.com)

SWISS INDEPENDENT WATCHMAKERS

Finn watchmaker TORSTI LAINE presenting Swiss made timepieces equipped with hand crafted guilloche dials and modified hand wound mechanisms ETA-6498 with steel bridges for the balance and escapement wheels, fitted in stainless steel cases of 41mm (photos www.watchadvice.com.au, www.lainewatches.com)

Swiss watchmaker CLAUDE MEYLAN established in 1988 presenting watches equipped with skeletonized hand wound or automatic ETA mechanisms fitted in round or tonneau stainless steel cases (photos www.fratellowatches.com)

Epilogue with KONSTANTIN CHAYKIN creative spirit ...

... plus HAUTLENCE & URWERK for the sake of avant-garde horology!
