SIXTY PLUS OUTSIDER WATCHES

CHRONOSWISS Timemaster 24H, introduced in 2002 with ref.CH6433, is my all-time favorite mechanical wristwatch for everyday use. A very functional 44mm timepiece with historical character, derived from its aviation design features, equipped with the extensively modified hand wound “workhorse” Cal.UNITAS/ETA-6497, along with the German-Swiss brand status, founded in 1983 by the pioneer watchmaker Gerd-Rudiger Lang. It belongs to a broad category of several underrated, though particular, significant and collectible wristwatches that deserve the proper attention of aficionados and collectors.

This presentation herein includes 60+ such watches, not necessarily fit in my relevant lists already issued, but certainly worth mentioning among the best watches presented, at least in the last twenty years. It is restrained to mechanical watches, not surpassing the “rational” limit of 10,000 euro. Sixty “outsider” models from sixty different brands representing the global watchmaking industry, in a must have photo album including an extensive tribute to artistically oriented watches, along with the most accessible repeater and tourbillon projects, based on Swiss made movements.

ARTISTICAL EFFECT TRIBUTE

Artistical watches belong to a broad category with a strong character, and a loyal customer base that not only likes art, but also looks for unique and different timepieces. Skeletonization, cartoon figures, special materials, creative designing are the basic options. More authentic, artistic watches are handmade, usually engraved and/or painted. Finding an affordable artistic timepiece is a challenge, especially when it is difficult to distinguish between a guilloche dial crafted with a rose engine lathe, or produced by a CNC machine, with the usual practice being a combination of both. One thing is certain, watches of real and high artistic value are so labor intensive that fully justify their extreme pricing. This tribute presents more than 30 brands established by very creative individuals who provide the market with some amazing timepieces. Above all, it is a tribute for all the talented artisans who make the watch making industry more beautiful though they rarely get the proper recognition.
